TABLE OF CONTENTS

VOLUME 7 1906

PAGES

BIRKHOFF, G. D., of Chicago, Ill. General mean value and remainder theorems 107–136

BLICHFELDT, H. F., of Stanford University, Cal. On the order of linear homogeneous groups 523–529

BLISS, G. A., of Princeton, N. J. A generalization of the notion of angle 184–196

BLISS, G. A., of Princeton, N. J., and MASON, M., of New Haven, Conn. A problem in the calculus of variations in which the integrand is continuous 325–336

BOLZA, O., of Chicago, Ill. A fifth necessary condition for a strong extremum of the integral $\int_{x_1}^{x_0} F(x, y, y')dx$ 314–324

———— Weierstrass's theorem and Kneser's theorem on transversals for the most general case of an extremum of a simple definite integral. 459–488

COBLE, A. B., of Baltimore, Md. On the relation between the three-parameter groups of a cubic space curve and a quadric surface 1– 20

CURTISS, D. R., of Evanston, Ill. Theorems converse to Riemann's on linear differential equations 99–106

DICKSON, L. E., of Chicago, Ill. On quadratic, hermitian and bilinear forms 275–292

———— Linear algebras in which division is always uniquely possible 370–390

———— On commutative linear algebras in which division is always uniquely possible 514–522

FIELD, P., of Ann Arbor, Mich. On the form of a plane quintic curve with five cusps 26– 32

FITE, W. B., of Ithaca, N. Y. Groups whose orders are powers of a prime 61– 68

FORD, W. B., of Ann Arbor, Mich. On the analytic extension of functions defined by double power series 260–274

GLENN, O. E., of Philadelphia, Pa. Determination of the abstract groups of order p^2qr; p, q, r being distinct primes 137–151

98880

PAGES

HASKELL, M. W., of Berkeley, Cal. The resolution of any collineation into perspective reflections 361–369

HASKINS, C. N., of Ithaca, N. Y. Note on the differential invariants of a surface and of space 152–154

———— On the differential invariants of a plane 588–590

HUTCHINSON, J. I., of Ithaca, N. Y. On certain hyperabelian functions which are expressible by theta series 21– 25

———— On automorphic groups whose coefficients are integers in a quadratic field 530–536

KASNER, E., of New York, N. Y. The problem of partial geodesic representation 200–206

———— The trajectories of dynamics 401–424

MANNING, W. A., of Stanford University, Cal. Groups in which a large number of operators may correspond to their inverses . 233–240

———— On multiply transitive groups 499–508

MASCHKE, H., of Chicago, Ill. Differential parameters of the first order 69– 80

———— The Kronecker-Gaussian curvature of hyperspace . . 81– 93

MASON, M., of New Haven, Conn. On the boundary value problems of linear ordinary differential equations of second order . 337–360

MCDONALD, J. H., of Berkeley, Cal. A problem in the reduction of hyperelliptic integrals 578–587

MILLER, G. A., of Stanford University, Cal. Groups containing only three operators which are squares 94– 98

———— The groups of order p^m which contain exactly p cyclic subgroups of order p^a 228–232

MORRIS, R., of New Brunswick, N. J. On the automorphic functions of the group $(0, 3; l_1, l_2, l_3)$ 425–448

MOULTON, F. R., of Chicago, Ill. A class of periodic solutions of the problem of three bodies with application to the lunar theory. 537–577

PIERPONT, J., of New Haven, Conn. On improper multiple integrals 155–174

———— Area of curved surfaces 489–498

RICHARDSON, R. G. D., of New Haven, Conn. Improper multiple integrals 449–458

SMITH, A. W., of Hamilton, N. Y. The symbolic treatment of differential geometry 33– 60

STÄCKEL, P., of Hannover, Germany. Die kinematische Erzeugung von Minimalflächen 293–313

STEPHENS, R. P., of Baltimore, Md. On the pentadeltoid . . . 207–227

PAGES

STICKELBERGER, L., of Freiburg, i. B., Germany. Zur Theorie der vollstandig reduciblen Gruppen, die zu einer Gruppe linearer homogener Substitutionen gehören 509–513

STROMQUIST, C. E., of Princeton, N. J. On geometries in which circles are the shortest lines 175–183

VEBLEN, O., of Princeton, N. J. The square root and relations of order 197–199

VEBLEN, O., of Princeton, N. J., and BUSSEY, W. H., of New York, N. Y. Finite projective geometries 241–259

WRIGHT, J. E., of Bryn Mawr, Pa. Correspondences and the theory of groups 391–400

Notes and errata: volumes 6, 7 591
